

## Grade #1 Bare Root

Container:

Premium 1 Gallon Pot

Finish:

6-8 weeks

When To Plant:

Spring

### Growing Temperature:

65-70° F

### Soil pH:

6.2-6.5

### Fertility:

Light to moderate fertility. Feed 75 - 100 ppm N at each watering or use a moderate rate of a controlled release fertilizer.

For Controlled Release or Slow Release Fertilizer, see your preferred supplier for recommended rates for incorporation or top dressing, as it varies by fertilizer.

### Moisture:

Moderate moisture

### Planting Level:

Eyes should be 0.5-1 inch below the soil line.

### Lighting:

High light levels and long days required.

### Holding Temperature:

60-65° F

### EC Level:

1.5-2.5 pour through method

### Vernalization:

We ship a vernalized bare root plant. Not recommended to overwinter in containers.

### Pests and Diseases:

Watch for slugs and snails. Botrytis can be problematic under humid conditions.

### Potting and Timing:

Spring potting of bare root plants is recommended.

Expect 6-8 weeks to fill out a 1 gallon container. It is best to use true 4 quart gallon pots instead of trade 1 gallon pots.

### PGRs/Pinching:

Not required

### Grower Tips:

Do not plant in the fall as Agapanthus do not overwinter well in containers.

If overwintering leftover plants it is best to do so in a minimally heated 35-38° F greenhouse.
